

Lighting Designer & Sound Engineer – Children’s Summer Theater Workshop

We’re looking for a talented **Lighting Designer & Sound Engineer** to join our Children’s Summer Theater Workshop team! This role works closely with our scenic designers, directors, and costume team to create dynamic lighting looks, program cues, set up and manage microphones, and run or supervise the booth during productions. You’ll have full access to our lighting and sound equipment, plus a supportive team of interns and staff eager to help with tech projects, setup, and show operations. If you love creating theatrical magic, enjoy collaboration, and thrive in a fun, fast-paced environment, we’d be excited to welcome you to our summer production team.

Responsibilities include:

- Designing and programming lighting looks for multiple workshop productions
- Collaborating with directors to create lighting and sound cues that support storytelling
- Setting up, labeling, and programming microphones for all shows
- Running or supervising the sound and lighting booth during tech and performances
- Coordinating with scenic and costume teams to ensure cohesive visual and technical design
- Training and guiding interns in basic lighting, sound, and booth operations
- Assisting with equipment organization, maintenance, and strike

Ideal candidates are:

- Experienced in lighting design, sound engineering, or related technical theater fields
- Comfortable programming lighting consoles and managing wireless microphones

This is a great opportunity for designers who love creating theatrical magic, enjoy teamwork, and want to make an impact in a fun, supportive children’s theater environment.
